- 1 Make an opening of diameter 86mm in the ceiling (1 - 1A), or diameter 88/90mm (1B).
- 2+3 Adjust the PLUG to the ceiling thickness + 2 mm(plaster thickness). Insert the PLUG into the opening in the ceiling. Screw on to the ceiling.
- 2A Use a wood piece, space it with glazing blocks to the plaster thickness, fixate the mount plug without metal wings with PUR foam. Remove the wood piece when PUR is dried.
- 2B Screw the mount plug in the concrete ceiling. Adjust the PLUG to the plaster thickness.
- 4 Plaster (use a 2 component filler) the rim between the PLUG and the ceiling. Keep the PLUG opening clean.
- 5 Paint the ceiling. For a perfect finish between PLUG and ceiling : leave a gap of 3mm between PLUG and ceiling and fill this gap with an elastic filler.

COUCOU

## INSTALL LIGHT FIXTURE

7. Connect the Led module or retrofit lamp and insert the module,

### DEEP - MOVE - COUCOU

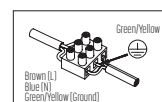

- 7.1. Connect the power supply. Pay attention to the polarity. Put the driver on the ceiling.
- 7.2. Click in the magnetic PLUG.
- 7.3. Put the power on.

!!! Never connect the fixture on 220-240V ac without driver. Lighting fixture is constant current driven. Always connect constant current leds in serial connection.

### BULB

- 7.1. Connect the E27 to the power supply.
- 7.2. Click in the magnetic PLUG.
- 7.3. Place the lightbulb and put the power on.

### LOFTR

- 7.1. Connect the power supply. Pay attention to the polarity. Put the driver on the ceiling.
- 7.2. Add weight of the fixture.
- 7.3. Click in the magnetic PLUG.
- 7.4. Put the power on.

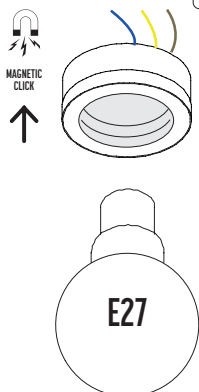

!!! Never connect the fixture on 220-240V ac without driver. Lighting fixture is constant current driven. Always connect constant current leds in serial connection.

### PULL

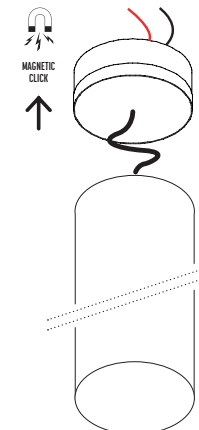

- 7.1. assembly doctor of the Dark lighting fixture.

The load force should be four times of the weight for the whole fixture. Max load force is force is 4.3 kg,so the max insert weight should not exceed 1.6 kg
